

ACNE, ROSACEA, AND RELATED DISORDERS (INCLUDING HIDRADENITIS SUPPURATIVA)

## **ACNE SCARRING AND KELOIDS – NEW APPROACHES**

*R Singh<sup>(1)</sup>*

*Dr R Singh, Private Practice, Durban, South Africa<sup>(1)</sup>*

**INTRODUCTION:** Acne scarring and keloids are extremely common conditions which plague many patients. While many practitioners still use the older methods, this talk will highlight the new methods that are available

**OBJECTIVES:** Treatment for acne scarring has become extremely popular, and more and more patients are opting for scar treatments. This talk is an overview of the latest available and cost effective treatments

**METHODS:** A comprehensive literature search was done and all the available treatments were analyzed. The newer treatments are being discussed

**RESULTS:** Acne scarring and keloids are difficult to treat, however there are revolutionary treatments available to the patient, and better treatments will be found in the future

**CONCLUSIONS:** As above
