LASER LIPOSUCTION – A SOUTH AFRICAN PERSPECTIVE

R Singh⁽¹⁾

Dr R Singh, Private Practice, Durban, South Africa⁽¹⁾

Introduction: Laser liposuction is becoming increasingly popular in South Africa, and more and more people are having the procedure, however SA has its own challenges. This talk will highlight the challenges faced in South Africa

Objectives: South Africa has one of the highest incidents of HIV, and lipodystrophy is extremely common. This talk illustrates how to deal with difficult cases of lipodystrophy

Methods: I have done over 500 liposuctions, and using my statistics I found SA to be unique in certain ways, therefore I am giving a South African perspective.

Results: A survey of over 500 people was done and a video presentation is shown

Conclusions: As above
