

DERMATOLOGICAL SURGERY

BASIC DERMATOLOGIC SURGERY

Christopher J. Arpey⁽¹⁾

Mayo Clinic, Department of Dermatology, Rochester, United States Of America⁽¹⁾

After attending this session, participants should become more comfortable with the fundamentals of cutaneous surgery. Topics covered will include preoperative assessment, biopsy techniques, as well as preoperative, intraoperative, and postoperative management skills. Critical anatomy, local anesthesia tips, and instrumentation suggestions will be provided. Speakers will provide advice for destruction of skin lesions, excisions, suturing techniques, electrosurgery, cryosurgery, and other surgical pearls. There will be a review of common complications and their management. There will be opportunity for questions and information exchange.
