

NAIL DISORDERS

## NAIL UPDATE SYMPOSIUM: UPDATE ON PEDIATRIC NAIL DISORDERS

*Jane Bellet*<sup>(1)</sup>

*Duke University School of Medicine, Dermatology & Pediatrics, Durham, United States Of America*<sup>(1)</sup>

A concise review of the most recent pediatric nail literature will be presented.

The following topics will be discussed: initiation of appropriate onychomycosis treatment for children; use of nail clippings to help diagnose psoriasis; and use of dermoscopy to ascertain benign nail matrix nevi in children. Other topics in recent articles that may be reviewed include: blue nails; transverse melanonychia secondary to chemotherapy; auricular acupressure for nail biting; and retronychia.
